ToughTech™ Duo

High-Performance RAID Storage System using dual 2.5" Notebook Drives

- RAID1, RAID0 and Single Drive operation modes.
- Default RAID1 Mirroring to assure data integrity and protection on the road.
- Designed for optimal heat dissipation.
- Easy-release removable 2.5" drive sleds.
- Designed for Solid State (SSD) & standard SATA HDDs.
- Quad host interface: eSATA, FireWire 800/400 & USB 2.0.
- FireWire is daisy-chainable with bus power.
- BUS powered from FireWire 800 interface.
- New user-friendly display menu, input selection & drive health monitoring.
- Uses S.M.A.R.T. (Self-Monitoring, Analysis and Reporting Technology) to track hard drive health, diagnostics to detect data loss and prevent failure.
- User-selectable temperature warning and alarm settings (LEDs & Audible).
- DC power available for USB & eSATA operation.
- Drive sleds allow for drive insertion/removal without tools.
- Ability to set PIN for configuration control
- Insertion rating ~ 25,000+

Versatility

Drives can be mounted with or without screws

Functionality

Portable bus-powered (FW800) RAID 0/1 with locking trays

Connectivity

FireWire 800/400, USB 2.0, eSATA
